

CLAIMS

We claim:

1. A biodegradable hydrophilic starch polymer dressing for wound treatment.
2. A dressing in Claim 1 wherein the starch polymer is dominantly comprised of the amylose form of the molecule.
3. A dressing in Claim 1 in which the hydrophilic nature is optimally controlled.
4. A dressing in Claim 1 which serves a vehicle of delivery of therapeutic agents, appropriate chemicals and biomolecules
5. A starch polymer that can be administered to wound sites as a preformed gel.
